Adjusted EBITDA	\$	58,988	\$	23,244	\$	161,465	\$	100,406	

<sup>(4)</sup> The above table reconciles Adjusted EBITDA to income before income taxes as reflected in the unaudited condensed consolidated statements of operations.

When we use the term "Adjusted EBITDA," it is referring to income before income taxes adjusted for: (a) net income attributable to non-controlling interests, (b) depreciation and amortization, (c) interest expense, net, (d) equity-based compensation expense, (e) contingent acquisition compensation expense, (f) transaction, integration and acquisition costs, (g) reserve adjustments, (h) loss on disposals and deconsolidations, net, (i) gain on litigation settlement, (j) gain on acquisition excrow release, (k) gain on amendment to tax receivable agreement and (l) loss on debt refinancing. We use Adjusted EBITDA as a measure of financial performance. Adjusted EBITDA is a key measure used by management to assess operating performance, make business decisions and allocate resources. Non-controlling interests represent the interests of third parties, such as physicians, and in some cases, healthcare systems that own an interest in surgical facilities that we consolidate for financial reporting purposes. We believe that it is helpful to investors to present Adjusted EBITDA as defined above because it excludes the portion of net income attributable to these third-party interests and clarifies for investors our portion of Adjusted EBITDA generated by our surgical facilities and other operations.

Adjusted EBITDA is not a measurement of financial performance under GAAP, and should not be considered in isolation or as a substitute for net income, operating income or any other measure calculated in accordance with generally accepted accounting principles. The items excluded from Adjusted EBITDA are significant components in understanding and evaluating our financial performance. We believes such adjustments are appropriate, as the magnitude and frequency of such items can vary significantly and are not related to the assessment of normal operating performance. Our calculation of Adjusted EBITDA may not be comparable to similarly titled measures reported by other companies.

<sup>(5)</sup> This amount includes transaction and integration costs of \$7.1 million and \$5.3 million for the three months ended September 30, 2018 and 2017, respectively, and acquisition costs of \$0.4 million and \$1.1 million for the three months ended September 30, 2018 and 2017, respectively. This amount includes transaction and integration costs of \$23.8 million for the nine months ended September 30, 2018 and 2017, respectively, and acquisition costs of \$1.6 million and \$2.6 million for the nine months ended September 30, 2018 and 2017, respectively.

<sup>(6)</sup> This amount represents adjustments to revenue in connection with applying consistent policies across the combined company as a result of the integration of Surgery Partners and NSH.

## SURGERY PARTNERS, INC. Reconciliation of Non-GAAP Financial Measures (Amounts in thousands, except shares and per share amounts)

From time to time, the Company incurs certain non-recurring gains or losses that are normally nonoperational in nature and that it does not consider relevant in assessing its ongoing operating performance. When significant, Surgery Partners' management and Board of Directors typically exclude these gains or losses when evaluating the Company's operating performance and in certain instances when evaluating performance for incentive compensation purposes. Additionally, the Company believes that certain investors and equity analysts exclude these or similar items when evaluating the Company's current or future operating performance and in making informed investment decisions regarding the Company. Accordingly, the Company provides adjusted net (loss) income per share attributable to common stockholders as a supplement to its comparable GAAP measure of net (loss) income per share attributable to common stockholders should not be considered a measure of financial performance under GAAP, and the items excluded from adjusted net (loss) income per share attributable to common stockholders are significant components in understanding and assessing financial performance. Adjusted net (loss) income per share attributable to common stockholders should not be considered in isolation or as an alternative to net income per share attributable to common stockholders as presented in the consolidated financial statements.

The following table reconciles net income as reflected in the consolidated statements of operations to adjusted net (loss) income used to calculate adjusted net (loss) income per share attributable to common stockholders:
